Education

University of California, Santa Cruz - Bachelors of Science Computer Science: Computer Game Design

Sept 2019 - June 2021

- **GPA: 3.8** Achieved with Highest Honors
- Relevant Coursework in: Game AI, Parallel and Concurrent Programming, Game Graphics

De Anza College - Associates in Arts, Emphasis in Behavioral Sciences

Sept 2013 - June 2017

Experience

Western Health Advantage, Sacramento CA

Junior Developer May 2024-Nov 2025 | **Software Developer 1** Nov 2025 - Present

I work as a member of the maintenance and operations team at WHA. My consists of application monitoring, patching, as well as maintaining and upgrading legacy applications to keep with best practices. Responding to alerts and working with colleagues of varying disciplines while maintaining clean communication enables my work. I developed on varying platforms containerized, on a remote linux server, or windows based applications.

Objective

I am a software developer early in my career. I have done application maintenance work as a part of my job, but I would also like to contribute to more green field development. Personal and technical growth are my long lasting goals, but also contributing and making a positive impact are the driving forces behind my work ethic.

Personal Project Work

MCTS - Tic Tac Toe AI (2023)

By creating a Monte Carlo Search Tree, I was able to create a simplified bot that is capable of playing tic tac toe. The bot uses a simple rollout strategy to explore future game states using only finished game boards as a heuristic to determine the proper move.

Skills and Technology

- | | |
|---|--|
| ● Fluent in C++, python, C#/VB, SQL | ● Unity Game Engine |
| ● Data Structure and Algorithm knowledge | ● Git Version Control |
| ● Basic knowledge of concurrent programming | ● Experience working in Unix environment |

Interests

Reading - Video Games - Jogging - Self Improvement - Expanding Programming Knowledge
